# RENOVA ORIGINAL

### TIMELESS BEAUTY

Sophisticated aesthets who desire contemporary design that never gets out of style will addict to the nostalgic, aesthetic shapes. Underlined by a large number of modern functions, Renova Original blends perfectly with all requirements on classical architecture.

# RENOVA GLASS

### URBAN VANGUARD

Sourcing elegant high-quality materials like glass, this vanguard design variant perfectly complement your modern interior. The timeless white and black combined with the elegantly sleek material match the novel architectural style of functionalism, lending a retro touch to your urban home.

# RENOVA EFFECT

### MAGNIFICENT ELEGANCE

Home-proud dwellers who love nature will get a charge out of this mineral- and woodtoned colour palette. A modern photographic technique makes Renova Effect available with a metallic, wooden or marble finishing, thus enhancing the elegance of an aged classic interior.

# FULL FLEXIBILITY

### CLEVER AND SMART

Simplify your life with smart and practical functions generating added value to the out-standing design of Renova. Various electrical inserts, crafty wallpaper protectors or the unique frame system for combination mounting you easily create the set of wiring \_\_\_\_\_\_ devices you need.

### Every-

thing was not better in the good old days. But a lot of things were often more beautiful. So if you are thinking of renovating, modernizing or complementing electric installations in an established environment, do not miss Renova. With its timeless, classic appearance this design range offers a number of remarkable features: black and white

# TIMELESS BEAUTY

finishing, from ancient like rotary switches to modern dimmers and data outlets, all rounded in sophisticated shape – Renova blends with your classical ambience, perfectly suiting

your desire.

# URBAN VANGUARD IN GLASS

Elegant and affordable, these switches are made of high-quality material, enhancing your decoration and adding a dash of purity. Since glass made a big entrance in the 1920s' architecture, this elegantly sleek material perfectly matches the novel architectural style of functionalism. Renova Glass captures this look, but thanks to its simple and pure design entirely flows into urban, public environments as well as highly sophisticated interiors. Design variants are available with a black or white base, housing one, two or three devices.

# MAGNIFICENT EFFECTS

Challenging or enhancing exclusivity in a luxurious room? Creating contrasts between old environments and modern furnishing? Complement your black or white Renova switches and accessories with the magnificent Renova Effect range. Those cover frames have been draped under a surface of photographic foil.

Choose between walnut or marble in white or black. Or do you desire bold and shimmering metallic surface in stainless steel, titanium, bronze or copper? With its deep, intense colouring, Renova Effect will bring a cutting-edge touch to your elegant decoration.

RENOVA FUNCTIONS

1:

### From

classical electronic functions (lighting dimmers, timers and movement detectors) to highly evolved multimedia outlets (Standard Radio/TV to Multimedia and Satellite) Renova is what you are looking for if you aspire to have the pleasure of nice elderly look equipped with unique accessories, all meeting todays demands on electric safety

# ICONIC IN DESIGN AND FUNCTION

and comfort. Smart properties like wallpaper protectors or the easy click-in technique for comfortable mounting of 2- and 5-gang combinations (even more if you want to) will further simplify your

# ENJOY MORE FLEXIBILITY

Renova contributes to environmental protection through various control features. As a matter of course, it also stands for a responsible use of resources. Therefore Renova is delivered with separate E-numbers, namely one for the insert and another one for the frame. So there won't be any left-over of components after installation, thus leading to reduced waste and costs.

There is a variaty of mixing and matching designs by choosing from two basic colours for switches and socket outlets plus different frames in several colours and material.

# PRACTICAL RECOMMENDATIONS

### WALLPAPER PROTECTORS

Probably you've noticed stains and marks on the wallpaper around your outlets. Let tricks from former times solve your problem. The Renova wallpaper protectors will reduce the wear and tear! In addition to the protective function they will also re-create that authentic feeling of an older house and cover marks from previous installations. The wallpaper pro-tectors are available in a white, black or transparent version, and for single or combination mounting. Electric devices don't need to be removed when applying the wallpaper protector, so the protection can easily be installed

### **COMBINATION FRAMES**

Renova has a unique system of frames for combination mounting. You do not need to have a lot of different frames to do your combination installations. Starting with a pair of end frames and adding middle frames you can create all the combinations of wiring devices you need. With the click-in technique mounting is easily done and the c/c-distance is 71 mm to fit box combinations.

### SURFACE MOUNTING

Renova can be mounted in flush-mounted or surface mounted boxes. A junction box is also available, with or without terminal block. For surface mounting use a round or oval box in white or black. The boxes suit the whole range except glass frames. All boxes have entries for neutral conductors and knock-outs for conduits. When making connections in the junction box you will notice the generous space and the smart terminal block.
